

# API Reference

This section contains reference documentation for working with protocol buffer classes in C++, Java, and Python. The documentation for each language includes:

- A reference guide to the code generated by the protocol buffer compiler from your `.proto` files.
- Generated API documentation for the provided source code.

Note that there are APIs for several more languages in the pipeline – for details, see the [other languages wiki page](#).

## C++ Reference

- [C++ Generated Code Guide](#)
- [C++ API](#)

## Java Reference

- [Java Generated Code Guide](#)
- [Java API \(Javadoc\)](#)

## Python Reference

- [Python Generated Code Guide](#)
- [Python API \(Epydoc\)](#)
